

# JIT-TESTING Survey

August 16, 2014

For the next statements please answer using a scale from 1 to 5, where each number has the following meaning:

1.Strongly disagree	2. Disagree	3. Neutral	4. Agree	5. Strongly agree.
---------------------	-------------	------------	----------	--------------------

1. Based on the examples the *amount of test code* in your test file (.jtl) was **less** compared with other unit testing frameworks for C (i.e. cmocka, xUnit, etc.):

1.Strongly disagree	2. Disagree	3. Neutral	4. Agree	5. Strongly agree.
---------------------	-------------	------------	----------	--------------------

2. Writting a test in terms of compilation, setup code, and cleanup code needed to test a specific function was very easy:

1.Strongly disagree	2. Disagree	3. Neutral	4. Agree	5. Strongly agree.
---------------------	-------------	------------	----------	--------------------

3. This tool will encourage a *Test Driven Development* methodology among C developers:

1.Strongly disagree	2. Disagree	3. Neutral	4. Agree	5. Strongly agree.
---------------------	-------------	------------	----------	--------------------

4. This tool will be useful for educational purposes:

1.Strongly disagree	2. Disagree	3. Neutral	4. Agree	5. Strongly agree.
---------------------	-------------	------------	----------	--------------------

5. In overall the usage of all the features this tool provides was very easy:

1.Strongly disagree	2. Disagree	3. Neutral	4. Agree	5. Strongly agree.
---------------------	-------------	------------	----------	--------------------

6. What did you **like** about the tool?

7. What did you **dislike** about the tool?

8. What feature would you like to see in this tool?
